

# 31 Years of getting the job *done!*

Manoeuvring a 250 tonne crane into place on a jack lift barge sitting on its 'spuds' out over the water next to a wharf in order to retrieve a damaged 112 tonne ship loader is literally all part of a day's work for Walz Construction.

While it is certainly one of the company's more unusual projects, it was a perfect fit for the construction firm's resources and approach.
